01 PROFILE

My work joins identity, infrastructure and hands-on support. I like making the systems behind a team understandable: who needs access, what depends on what, and how to recover when something changes.

02 EXPERIENCE

Founder / Product Engineer / Systems Lead · Technomancy IT LLC | Present

Own client systems, infrastructure, identity and direct support from unclear requirements through implementation.

Implemented Windows Server, Active Directory and VPN access for Excell; build tenant-aware identity and enterprise integrations.

Full-Stack Engineer / Technical Owner (client contract) · NuPrice, Technomancy IT client | 2019-2021

Built and operated the application, billing, customer support and technical operations for a long-term client engagement that began while I was still at FRII.

Connected marketplace data, repricing rules, accounts, subscriptions and support workflows; carried responsibility across application behavior and the systems serving customers.

Senior Systems Engineer / Datacenter Architect · Front Range Internet Inc. | 2015-2020

Ran the NOC and engineering escalations for hosting and colocation customers; built tooling for operations teams.

Worked across Windows/Linux, virtualization, Docker and AWS; ran SOC 1 and SOC 2 audits and held sole systems-engineering responsibility for about a year.

Systems / Software Engineer · Office Evolution | 2014-2015

Connected CRM, provisioning, onboarding and service operations through shared applications across locations.

Worked with the CEO and CIO to turn cross-department handoffs into explicit operational workflows.

Network & Systems Engineer · PlumChoice / Everon | 2012-2014

Engineered and supported business networks, systems and endpoints in a managed-services environment.

Handled monitoring, on-call troubleshooting and recovery, built diagnostic tools and delivered antivirus services.

Infrastructure and Systems Focal · IBM | 2010-2012

Operated shared enterprise infrastructure and coordinated changes, incidents and escalations across application, infrastructure, vendor and business teams.

Automated audit and backup workflows; managed virtualization test labs and hosted desktop platforms.

03 SELECTED WORK

Excell Services | Servers, access and a satellite office · Technomancy IT client, Wray, Colorado

Modernized legacy servers, employee computers and networks with Windows Server, Active Directory and VPN access.

Helped bring a satellite location online, connecting hands-on system changes with day-to-day client support.

Radar sensing client | Full-stack and research-team support · Long-term Technomancy IT client

Served as full-stack engineer and provided DevOps setup and support for a data-science and AI team.

Supported work on an embedded radar device placed under beds to detect heart rates, connecting application and infrastructure responsibilities.

04 CAPABILITIES

Windows Server / Active Directory / Entra ID / access controls · AWS / Azure client environments / Hyper-V / ESXi / Docker · Endpoints / PowerShell and Bash / monitoring / recovery · Onboarding workflows / operational tooling / audit evidence / escalation
